

## ***Press release***

Rittal Limited

Date of issue: 29 July 2015

### **Rittal's enclosure solutions on show at Offshore Europe 2015**

Rittal will be out in force, showcasing its top-of-the-range system at this year's Offshore Europe 2015 event in Aberdeen. With many specific and often high-risk security issues in the oil and gas industry, safety remains of paramount importance in the use of correct equipment and preventing sources of ignition.

Visitors to Rittal's Stand 4E120 will be able to view a range of Rittal's innovative modular enclosures, power distribution and climate control systems, routinely specified as the No 1 choice throughout the industry for protecting critical equipment.

Rittal's technical experts use ingenuity and smart thinking in areas such as optimising physical work spaces while its high-quality designs minimise the damaging effects caused by the tough operating conditions typically found in offshore environments. What's more, thanks to Rittal's local enclosure manufacturing base in Plymouth, its product offering can be readily adapted to meet most customer needs.

Also on show will be motor control centres based on the market leading TS 8 enclosure platform. Complimenting this is design and calculation software which can help users correctly identify the heat dissipation requirements within enclosures, and support their application and installation.

In addition, visitors will be able to review Rittal's busbar system, its extensive range of wall-mounted enclosures and the TS IT which is a fast, simple and flexible enclosure system featuring snap-in technology, flexible internal configuration and intelligent cable management.

To find out more about Rittal's enclosure solutions and accessories for the oil and gas industry, come to Stand 4E120 at Offshore Europe, 8-11 September 2015, at AECC, Aberdeen.

## **Notes**

Rittal, headquartered in Herborn, Hessen, Germany, is a leading global provider of solutions for industrial enclosures, power distribution, climate control and IT infrastructure, as well as software and services.

Systems made by Rittal are deployed across a variety of industrial and IT applications, including vertical sectors such as the transport industry, power generation, mechanical and plant engineering, IT and telecommunications.

Rittal is active worldwide with 10,000 employees and 58 subsidiaries.

Its broad product range includes infrastructure solutions for modular and energy-efficient data centres with innovative concepts for the security of physical data and systems. Leading software providers Eplan and Cideon complement the value chain, providing interdisciplinary engineering solutions, while Kiesling Maschinen-technik offers automation systems for switchgear construction.

Founded in Herborn in 1961 and still run by its owner, Rittal is the largest company in the Friedhelm Loh Group. The Friedhelm Loh Group operates worldwide with 18 production sites and 78 international subsidiaries. The entire group employs more than 11,500 people and generated revenues of around €2.2 billion in 2014.

For the seventh time in succession, the family business has won the accolade "Top German Employer" in 2015.
